

## Job Posting – Production Technician

We are the world's leading vanadium flow battery company. Our energy storage systems are facilitating real change for a renewable and sustainable future.

Our production team has grown, and we are hiring a Production Technician to support the Operations Manager with facilities support and production development projects in our Vancouver plant. The plant is located on Powell Street near Clark.

The role is a regular full-time position with health benefits after successful completion of a 3-month probation period.

Responsibilities include:

- Work with the Operations Manager and Engineering to implement continuous improvement activities
- Support the Production Team, respond to mechanical and electrical questions, seek information from Engineering as needed
- Identify quality and efficiency increase opportunities and help implement
- Ensure facilities operates efficiently, including health and safety requirements
- Perform alarm system test, fire drill, and confirm health and safety equipment is in place
- Assist with Supply Chain activities such as inventory, deliveries and equipment set ups
- Occasional overtime and on-call may be required
- Other duties as needed

Skills and Qualifications:

- Experience in a manufacturing environment
- Mechanical and electrical knowledge and experience, some experience reading schematics
- Strong knowledge of Occupational Health Safety
- Forklift certification or Level 1 / Level 2 first aid would be an asset
- Proficient in MS Office Suite and general computer literacy
- Physically able to sit, stand, walk, bend, etc. and able to occasionally lift or move up to 50 pounds
- English communication, reading, and comprehension
